

## Swings 2004

### METAL SWING FRAMES

For large swing metal swing frames, the tp Single, Double and Triple Giant Swing Frames can't be beaten. There are a variety of single and two person swing accessories available so that you can choose a combination to suit the needs of your family. (Each position can take either one duo ride, or one single seater). The addition of a Swing Extension Tube to either or both ends of the frame allows for even more variation.

Made from 50mm diameter galvanised steel and standing over 2m high, these swings offer superb stability - the legs forming a near equilateral triangle. Ground stakes (which can be concreted in for more adventurous swinging) are supplied.

Lifetime guarantee against rust causing failure.

N.B. Swinging accessories are not supplied with the frames, so have to be ordered in addition.

The Giant Swing Frames have the advantage of having the possibility of being combined with tp's Swingdeck and associated accessories - providing opportunities for climbing, hiding and sliding.

**Single Giant Swing Frame**  
(Shown with Wraparound Seat)

Price as shown £107.95

**Double Giant Swing Frame**

(Shown here with Extension Tube and Nursery Swing Seat, Deluxe Swing Seat and Skyride)

Price as shown £198.85

**Triple Giant Swing Frame**

(Shown with Basketball Game Set & Mounting Kit, Skyride, Deluxe Swing Seat and Rockerboat)

Price as shown £303.75

**Double Giant Swing Frame with Swingdeck** (+ 3m Slide, Swingdeck Tent and Toddler Kit, Skyride & Deluxe Swing Seat)

Price as shown £414.80

For a durable and colourful option, we would recommend Kettler's range of swing sets, which come complete with accessories and represent excellent value for money. The tube used to manufacture Kettler's swing frames is cleaned, then given a coating of iron phosphate on both the outside and the inside surfaces. This special coating provides protection against rust. A weatherproof polyester coating is then applied to the outer surface - providing the colour for which Kettler is known. The Kettler frames are secured to the ground by metal anchors that can be concreted into the ground, and come with a three year warranty against any defects.

**De-luxe Single Swing**      £50.00

**De-luxe Double Swing**      £70.00

**4 Child Mutiplay**  
**With Glider (as shown)**      £100.00  
**With Gondola**      £115.00

**5 Child Muliplay**  
**With Gondola (as shown)**      £140.00  
**With Surf-board**      £150.00

(Surf-board)

## Metal Swings on a smaller scale

### Severn Swing £35.00 as shown

Suitable for children up to approximately 25kg, the Severn Swing is the more inexpensive of all the swings in our range. It can be assembled at either full or half height, and comes with hook stakes to anchor it to the ground for stability. It comes with a moulded seat, but alternative accessories may be purchased in addition.

### Rocket Swing (shown here with a deluxe swing seat) £55.95 as shown

The rocket swing is over 7' in height and is more robust than the Severn Swing. It comes without a seat, so you can choose the seat that best meets your needs. It can be assembled at low height or full height, and is suitable for children up to approximately 35kg. Special twisted stakes anchor the frame to the ground.

### Acorn Playframe with Platform (Shown here at full height with 2.42m Slide Body, Deluxe Swing Seat, and Climbing Goal Net) £225.85

The Acorn Playframe is a good solution for situations where space is limited, because it combines climbing, sliding and swinging in one compact play area.

Can be assembled at full or half height. Stakes are provided to secure the frame to the ground. Suitable for children up to approximately 35kg.

## TIMBER FRAMES

### Double Swing Frame with Extension, Ladder and Net

(Shown here with Climbing Rope, Trapeze Bar & Rings and Sling Swing)

Price as shown £442.00 ( + £20.00 delivery)  
(Price without Ladder and Net - £272.00)

In wood, the Caledonia range offers quality, stability, durability and superb versatility - each of the swing frames can be combined with one or more of Caledonia's climbing and sliding products, making this one of the most versatile systems available.

All swings in the range blend attractively into any garden setting, and there is one for every scale of garden. Their design makes them very stable, and capable of partially compensating for uneven ground or slight slopes. Single, double or triple swing versions are available, and each can also have an extension to the top bar in order to accommodate another swinging accessory or climbing rope.

All timbers are pressure treated and impregnated with wax, providing a more water repellent surface, so reducing water absorption and delaying future rotting of the timber.

N.B. Swinging accessories are not supplied with the frames.

### Sherwood Double

(Shown here with Deluxe Swing Seat and Rockaboard)

Price as shown £275.95

The top Sherwood Double and Triple Swing Frames are made from pressure treated pine and galvanised steel to combine a contemporary look with a long play life. In 2004 this range has been expanded to include climbing modules that can be added to the swings.

Sherwoods come complete with galvanised ground stakes and with steel collars and quick release galvanised steel snap shackles to enable easy attachment of single seater swing seats. Special duo-ride brackets are needed for the attachment of duo-rides, and these should be purchased separately (Skyride requires 1 duo-ride bracket, Pirate Boat, and Rockaboard each require 2)
